

# Making Your Own Fire Escape Plan

- ✓ Start with a basic layout of your house with doors and windows included.
- ✓ Go around to each room and look for two ways out of the room.
- ✓ Check for smoke detectors in your house. Test them by pressing the “Test” button and make sure they work.
- ✓ Look for a safe spot outside but in front of your house for everyone to meet at.
- ✓ Look at your house from outside and see if your address or building number is able to be seen from the street.
- ✓ Have a family planning night and talk about a fire plan.
- ✓ Remember that 9-1-1 is the emergency phone number for the fire department.
- ✓ Once you have a plan, practice it with your family.
